Along the Way

• Population growth affects socio-economic development
  – RAPID raised awareness at highest level

• Family planning contributes to the Millennium Development Goals
  – FP indicators included in the PRSP

• FamPlan informs FP strategy development
  – Data highlights need for a regional approach
Population Growth Affects the Health Sector

By 2035....
- 4,000 more health facilities
- 14,000 more nurses
- US $2.2 billion more required

Projected Annual Health Expenditure
2005 - 2035

Cumulative savings
US$2.2 billion
FP Contributes to the MDGs

- $58 million to meet unmet need for family planning

- $153 million total cost savings for reaching MDG targets in:
  - education
  - malaria
  - immunization
  - water and sanitation
  - maternal health
FamPlan Informs Strategy Development

- Highlighted regional differences
- Underscored need for demand-side interventions for specific regions
- Informed costing of the implementation plan
- Influenced resource allocation decisions
Pulling It All Together
