Website Purpose

- Create an online resource for family planning stakeholders to:
 - Learn more about health financing concepts and how they relate to family planning
 - Understand family planning financing options given a country's context

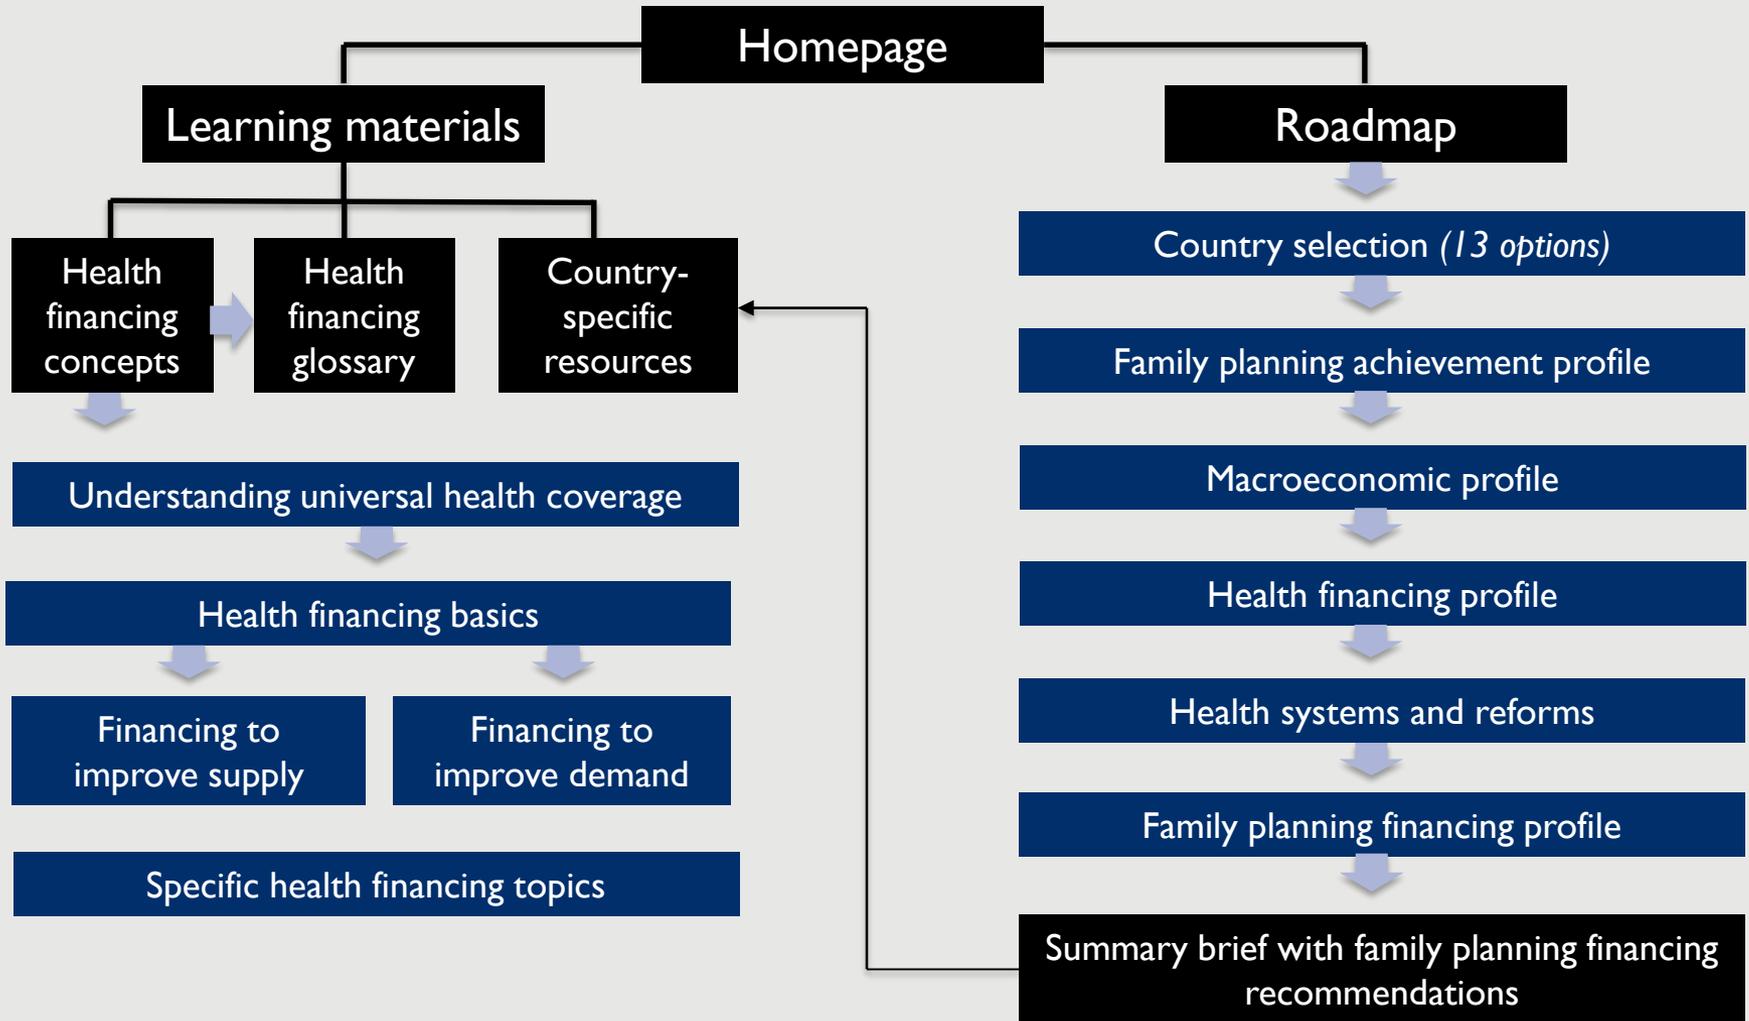

Why Is This Resource Needed?

Family planning experts need a strong understanding of health financing concepts and a country's health financing situation to promote strategies for sustainable financing of family planning programs.

Website Structure

Learning Materials

- High-level intro to health financing for users with limited time and knowledge
 - Content ranges from basic to more complex topics
 - Links to glossary and external resources
- Structure of content:
 - Overview of issue/concept
 - Explanation of how concept is important for family planning
 - Country examples/case studies
 - Links to external resources

- Introduction to universal health coverage
 - Health financing: the basics
 - Financing to improve supply of services
 - Financing to improve demand for services
- Specific topic pages
 - Domestic resource mobilization
 - Planning for donor transitions
 - Health insurance
 - Public financial management
 - Fiscal decentralization in health
 - Global Financing Facility
 - Vouchers and conditional cash transfers
 - Performance-based financing
 - Total market approach

Interactive, Country-Specific Roadmap

- **Purpose:** Identify relevant family planning financing options given a particular country's health financing and family planning context
- **Key features:**
 - Pre-populated data from secondary sources (editable)
 - Links to glossary terms
 - Underlying algorithm categorizes countries into **archetypes** based on current modern contraceptive prevalence rate (mCPR) and health financing maturity level

Initial launch includes 13 countries:

- Ethiopia
- Ghana
- Guatemala
- Kenya
- Madagascar
- Malawi
- Mali
- Mozambique
- Nigeria
- Rwanda
- Senegal
- Tanzania
- Uganda

Nine Archetypes

	Low mCPR (S1)	Growing mCPR (S2-S4)	High mCPR (S5)
Low maturity health financing system	1	2	3
Emergent and aspirational health financing system	4	5	6
Mature health financing system	7	8	9

How are countries classified?

- **Health financing maturity level:** Calculated score based on country income status, macroeconomic projections, prioritization of health, reliance on external funding, and coverage of pre-payment schemes
- **mCPR:** Based on baseline mCPR among women of reproductive age in union (< 15%, 15%–40%, > 40%)

Roadmap Outputs

Family planning characterization

- Current family planning achievement
- Family planning goals

Outputs can help in-country family planning stakeholders to:

- Narrow down concepts for individualized learning
- Prioritize appropriate family planning financing options to be considered
- Advocate for inclusion of family planning in broader health systems reform
- Identify evidence gaps on family planning financing
- Engage with other stakeholders regarding sustainable financing for family planning

Health financing characterization

- Health financing profile and statistics
- Health financing reforms under consideration
- Country's ability to increase spending on health

Family planning financing characterization and recommendations

- Family planning financing profile
- Broad implications of family planning financing based on archetype
- Specific family planning financing options
- Links to learning materials and country resources

Website Demonstration

Next Steps

- *Want to learn more and provide feedback?*
 - Sign up for a **one-on-one session** sometime this week (*use sign up sheet at the front; country delegations encouraged to sign up together*)
- *When will this resource be available?*
 - Website is still under development
 - Launch is tentatively planned for February 2018
